

Helmet Policy

The use of crash helmets is compulsory for all events. Only helmets are permitted whose shell and padding cover the head and ears. Helmets with spoilers or edges that protrude are not permitted. Certain helmets must show a smooth top surface for safety reasons.

Helmets used in FIS Snow sports shall be specifically designed and manufactured for the respective discipline and shall bear a CE mark and conform to recognized and appropriate standards such as CEE 1077 or US 2040, ASTM F2040, SNELL S98 or RS 98, etc. Soft ear protections are only allowed for SL events.
